American Board of Thoracic Surgery Report
to the
Thoracic Surgery Directors Association

New Mission Statement
After much deliberation, the American Board of Thoracic Surgery (ABTS) has adopted a new Mission Statement that has a stronger emphasis on service to the public, its Diplomates and future candidates. Below is the new ABTS Mission Statement:

“The American Board of Thoracic Surgery serves the public by promoting excellence in practice through rigorous evaluation and examination, providing leadership in education, and ensuring high standards for professionalism, lifelong learning and certification.”

New Nomination Process to the American Board of Thoracic Surgery
At the 2016 Fall Meeting, the ABTS voted to change its nomination process to the Board of Directors by creating three new Director-at-Large seats. Nominations for these seats will be solicited from national and regional thoracic surgery organizations. The Board will also establish a self-nomination process for these Director seats. The first Director-at-Large seat will be available in 2017. Details about the self-nomination process will be posted on the Board’s web site in early 2017.

New Operative Case Requirements for Residents
At the 2016 Fall Meeting, the ABTS adopted a new set of operative case requirements for residents who start their thoracic surgery training on or after July 1, 2017. The new operative requirements, which will affect both traditional and integrated residents, will now include TAVR and will emphasize future skills needed for the specialty. Preliminary case numbers for the integrated residents will remain the same; however, there will now be more flexibility in the areas from which the cases will count. For additional details, please visit the ABTS web site at www.abts.org.

New Synchronization of the Subspecialty Certificate to the Primary Certificate
The ABTS will be implementing a plan that would synchronize the valid through date on the congenital cardiac surgery subspecialty certificate with the Diplomate’s primary certificate. The goal is for the two certificates to have the same valid through dates, which will allow a Diplomate to maintain both certificates at one time. Details of the synchronization plan have been sent to those Diplomates affected by this change.

MOC Part III Exam Format
The ABTS received approval from the American Board of Medical Specialties (ABMS) to continue to offer its Maintenance of Certification (MOC) Exam in a Mastery Learning format using SESATS questions. Instead of taking the exam at a Pearson Testing Center, Diplomates enrolled in the 10-year MOC process will take the exam on their home or
office computers provided that it has Internet-capability. The new MOC Exam format will be specialty specific (Adult Cardiac, General Thoracic, Cardiothoracic, and Congenital) and consists of approximately 100 SESATS questions. The goal of this new exam format is to provide a learning opportunity using judgement and decision-making as well as knowledge.

**MOC Part IV Requirements**
As a reminder, the ABTS now requires Diplomates in the MOC process to participate in a Practice Quality Improvement (PQI) project. Diplomates can fulfill the PQI requirement individually, as a group or through his/her institution/health care organization. More information about acceptable PQI Projects is available on the Board’s web site at www.abts.org.

In addition, Diplomates enrolled in MOC will now need to participate in a Patient Safety Module. The Board will accept most Patient Safety Modules during the initiation of this program.

**Renewal Policy for Diplomates who hold Lapse Certificates**
The ABTS changed its policy regarding the renewal of a lapsed certificate. Previously, Diplomates who held an invalid certificate had to take and pass the Part I (Qualifying) and Part II (Certifying) Examinations in order to obtain a valid certificate. Effective immediately, Diplomates whose certificates expired in 2010 or after can renew their certificate by coming in to compliance with MOC, including submitting an application, paying all dues and late fees, and taking and passing the MOC Exam. Diplomates then need to take and pass the Part II (Certifying) Exam. Diplomates whose certificate expired before 2010 will still need to take and pass Part I and II exams.

**SESATS XII (12)**
SESATS XII (12) is currently under development by the ABTS. Similar to SESATS XI (11), SESATS 12 will be a web-based, self-assessment education tool that will cover all areas of thoracic surgery. It will also be functional on multiple platforms, such as smart phones, tablets, and desktops. The expected release date for SESATS 12 is early summer 2017.

SESATS XI (11) is still available for purchase at www.sesats.org. SESATS 11 contains 400 questions, critiques and readings covering all areas of thoracic surgery. Up to 70 CME hours can be earned by taking SESATS 11.

**Pathways to Certification**
Eligibility to enter the ABTS’ certification process may be achieved by completing one of four training pathways and fulfillment of the other requirements. Details about each pathway can be found on the Board’s web site.
With regards to single accreditation, the ABTS’ policy is to accept osteopathic residents provided they had three years (PGY 3-5) in a general surgery residency that was accredited by the ACGME followed by a two or three year thoracic surgery residency accredited by the ACGME.

**Examinations**
The Board administered the Part II (Oral) Examination to 129 individuals on June 10-11, 2016. The pass rate for the examination was 78%. The next Oral Exam will be held on June 9-10, 2017 in Chicago.

The 2016 Part I (Written) Exam was administered on December 12, 2016. The pass rate for the exam has not yet been determined. The 2017 Written Exam will be held on December 11, 2017.

**Congenital Cardiac Surgery Subspecialty Certificate**
The Congenital Cardiac Surgery Oral Exam was administered on June 9, 2016 for the fellows who were successful on the Qualifying Exam. The pass rate for the exam was 87%. The next Oral Exam will be held on June 8, 2017.

The 2016 Congenital Cardiac Surgery Written Exam was held on November 21, 2016. The pass rate for the exam has not yet been determined. The next Congenital Cardiac Surgery Written Exam will be held on December 4, 2017.

**New Board Directors**
At the 2016 Spring Board Meeting, Dr. Christine L. Lau (Charlottesville, VA) was elected to serve a six-year term as Director of the Board. In January 2016, Dr. Anne G. Rizzo (Falls Church, VA) was appointed to a six-year term as a Director on the ABTS by the American Board of Surgery.
