Bringing Practice to the

Practice of Medicine ®

The Chamberlain Group produces anatomically accurate medical models that capture the consistency and response of living tissue, providing the best alternative to animals and cadavers for training in new devices and procedures.

In close collaboration with medical device companies and teaching hospitals in 50 countries, we meet procedural training objectives with clean, smart solutions that illuminate, educate and differentiate.

Our custom anatomy is recognized worldwide for its superior visual and experiential realism. We also offer a line of existing products for purchase.
